

# Claim Benchmarking

## EMPLOYEE BENEFITS

### Overview

Companies need a competitive edge when faced with uncertainty. Our emphasis is on enhancing member satisfaction and fostering employer group retention through comprehensive data warehousing and healthcare analytics, ultimately providing your organization with a clear understanding of your experience and outcomes in relation to industry norms.

### Insights

Holmes Murphy's Claim Benchmarking capability stands out in the market due to its features, combining access to extensive national datasets with insights derived from your own book of business. This insight allows us to compare your performance against peers in your same region or industry.

- **Demographic Comparison:** Some benchmarks make automatic adjustments for age and gender, ensuring a more equitable comparison.
- **Performance Check:** Your organization can focus on specific areas where you are underperforming.

### Impact

Holmes Murphy's Claim Benchmarking capability helps your organization gain a competitive edge through aggregating and benchmarking claims, clinical, lab, and third-party data. This enables cost reduction, minimizes hospital re-admissions, identifies care gaps, and improves overall patient care.
